

Peel and Stick Vinyl Self-Adhesive Flooring Tiles

Cushion your garage or basement floor, insulate and reduce both noise and the amount of dirt tracked into the home from the garage with Peel-N-Stick Tiles, a specially formulated, commercial grade G-Floor® polyvinyl material with peel-off, press & stick backing.

Made in the USA from solid virgin vinyl, they provide an extremely tough (gloss finish) that will look great for years (5-year warranty) in the garage, basement, or any other room of the house. The pressure sensitive adhesive backing virtually seals floors from moisture to help prevent concrete damage.

Material is not brittle; won't chip or crack & the adhesive never hardens completely, so tiles can be moved or re-positioned if necessary.
